### THEMES

**Sustainable Development Goals in South Asia: Key Issues, Opportunities and  
Challenges**

**Sub-Themes of Conference**

- Behavior towards sustainability
- Communication tools for sustainable development
- School-community partnership
- Sustainability education by private industry
- Health and the environment
- Hybrid energy systems
- Institutional development
- Interaction between pollutants
- Legal, economic and managerial aspects of solid waste management
- Management and regulation of point and diffuse pollution
- Management of water treatment residuals
- Modelling and decision support tools
- Nutrients removal
- Optimization of collection systems
- Physical and Social hydrology
- Quality guidelines, environmental regulation and monitoring
- Regulatory practice
- Reuse of reclaimed waters
- Industrial pollution and environment
- GIS And Remote Sensing
- Satellite applications in the environment
- Soil decontamination
- Storage technology
- Suspended and fixed film biological processes
- Sustainable cities
- Technical aspects of treatment and disposal methods
- Trans-boundary cooperation
- Solar Energy and Sustainable Development
- Impact of Natural Environment on Literature
- Waste minimization
- Wastewater and sludge treatment
- Water quality
- Agriculture and water resource management
- Environment and ecology
- Water Resources In Arid Regions
- Biodiversity and Sustainable Development
- Natural Resources and Laws
- Water resources and river basin management
- Wetlands
- Energy Engineering
- Demand-side management
- Distributed ledger systems for energy
- Economic instruments
- Energy efficient systems
- Energy policies and economics
- Sustainability, Society, and Education

- Challenges, barriers and opportunities
- Environment and climate friendly schools
- Sustainability across curriculum
- Sustainable Development and education
- Health related organisms
- Industrial wastewater treatment
- Integrated ecosystems management
- Landscape degradation and restoration
- Life cycle analysis and Systems process accounting
- Management of hazardous solid waste
- Meteorology
- Monitoring and analysis of environmental contaminant
- On site and small scale systems
- Ozone layer depletion
- Public participation
- Recycling and reuse
- Resource management
- Socio-Economic Aspects
- Social Problems and environment
- Nature and Man-Made Disasters
- Sludge treatment and reuse
- Solid waste management
- Storm-water management
- Sustainability in process industries
- Systems embodiment accounting and input-output analysis
- Toxicity assessment and epidemiological studies
- Waste management
- Environmental Changes and Agricultural Production
- Natural Resources Reflected in the Literature
- Waste valorization
- Water and Soil reservation
- Water quality objectives standard setting
- Water, Food and Energy
- Water Quality and Health
- Impact of Technology on Environment
- Natural Resources and Tourism Development
- Ocean Resources and Sustainable Development
- Water treatment and reclamation
- Zero Energy building
- Control technologies
- Distributed energy resources
- Eco-technology
- Electricity market and electricity supply chain
- Energy management and audit
- Energy security and clean use
- Energy and sustainable development

**Note:-**  
Sub themes of the conference broadly cover the aspects of "Sustainable Development Goals in South Asia: Key Issues, Opportunities and Challenges" but are not limited to the sub themes explicitly mentioned here. Any other good quality research paper that relates to the focal theme may also be considered for presentation and publication.
